SPECTRUM KILLIAN DENTAL LAB

Account Overview

2026

SKDLA

- A high-end dental laboratory specializing in advanced esthetics and complex restorative solutions.
- They operate primarily out of advanced Centers of Excellence located in Orange County (Santa Ana) and Los Angeles (West Hills), California.

supportninja

How It Helps Customers (Dentists & Clinicians)

Spectrum Killian focuses on streamlining the restorative process through technology and communication:

1. Advanced Digital Workflow

By utilizing 3Shape scanning and design software, the lab allows dentists to submit digital impressions. This reduces the margin of error associated with traditional molds, leading to better-fitting prosthetics and fewer remakes.

2. The Dentist Portal

They offer a proprietary digital portal that serves as a central hub for clinicians to:

- **Track Cases:** View the real-time status of every case at the touch of a button.
- **Direct Communication:** Each case has a dedicated chat thread, allowing doctors to speak directly with the technician working on that specific restoration.
- **Logistics:** Dentists can schedule pickups or print free shipping labels directly from the interface, saving administrative time.

How It Helps Customers (Dentists & Clinicians)

Spectrum Killian focuses on streamlining the restorative process through technology and communication:

3. Clinical & Aesthetic Support

The lab acts as a consultant for complex cases. They provide Smile Design consultations and shade accuracy guidelines to ensure that the final result looks natural and meets the patient's cosmetic expectations. This expertise helps dentists tackle more difficult full-mouth rehabilitations with higher confidence.

4. Precision & Speed

By operating as an alliance with multiple locations, they leverage shared expertise and high-capacity milling centers to provide quick turnaround times without sacrificing the boutique quality of a small lab.

Customer Service Team Expectations

supportninja

The Customer Service team plays a critical role in supporting our doctors, partners, and internal teams. These expectations are designed to promote consistent communication, accountability, and an exceptional customer experience. This document is a living guide and may be updated as business needs and best practices evolve.

supportninja

Call Handling and Performance

- All incoming calls are recorded and subject to quality review.
- Team members will meet biweekly with their manager for call review, coaching, and performance feedback.
- A minimum of 35 incoming calls answered per day, and 50% outbound resolution is expected. This standard may be adjusted based on call volume and operational trends.

Call Handling and Performance

- Calls must be handled professionally, using company-approved scripting, and managed efficiently with full ownership from start to resolution.
- All emails must be acknowledged and responded within 2 hours of receipt.

supportninja

Call Documentation and ABS Usage

- All calls must be logged in ABS under the Call Notes tab using the Customer Service activity type. Every call requires a note that clearly states the reason for the call and the outcome to ensure internal alignment.
- Call notes must be completed in ABS before any call is escalated.
- All negative feedback or issues that impact the customer experience must be logged as a Complaint in ABS, using the appropriate subcategory and the complaint template. Complaints must be assigned to the appropriate BU leader.

Call Documentation and ABS Usage

- All positive feedback must be logged as Positive Feedback in ABS, using the appropriate subcategory and template, and assigned to the appropriate BU leader.
- All technical calls must be logged under the Technical Support activity type. Technical support notes will be printed on the work ticket.

Phone Etiquette

- Before transferring or handing off a call, all existing case and account notes must be reviewed.
- No blind transfers are permitted. Ownership remains with the CS representative until a proper handoff is completed.
- Maintain professionalism at all times. Internal concerns or operational issues should not be shared with customers.

Phone Etiquette

- Minimize hold times. Customers should not be left on hold for longer than 2 minutes. If the customer chooses to remain on the line, provide a status update every 2 minutes until the issue is resolved.
- For technical-related feedback, CS is responsible for screening the call and confirming all required information from prior notes or Technical Advisor (TA) questions is captured.

supportninja

Voicemail Management

- All voicemails must be returned and cleared by the end of each business day.
- At the end of your shift, please send your manager a screenshot confirming that all voicemails have been cleared.

supportninja

Portal Ticket Expectations

- All assigned portal tickets must be addressed and closed within 2 business hours during operating hours.

supportninja

Customer Experience and Reviews

- Each Customer Service representative is accountable for earning a minimum of one five-star Google review per month through quality service and positive customer interactions.
- All Google review emails must be Bcc'd to management or forwarded for visibility.

Professional Standards

- Maintain a professional tone and clear, respectful communication at all times.
- Follow established workflows, escalation paths, company policies, and approved scripts.
- Collaborate effectively with the team members and cross-functional partners to ensure a seamless, consistent, and positive customer experience.

supportninja

Time and Attendance

- Team members are responsible for accurately entering their own sick time when calling out.
- Requests for time off (R/O) are first come, first served and remain requests until formally approved.
- During breaks, coverage must be maintained with one person at on break at a time.

Time and Attendance

- Once time off is approved, create and send a calendar invite to your manager for visibility.
- Support team coverage needs and collaborate to protect call answer rates and response times.

Performance Management and Accountability

- Failure to comply with the expectations outlined in this document will be addressed through the company's performance management process.
- Continued or repeated non-compliance may result in corrective action, up to and including termination of employment, in accordance with company policy and applicable laws.
- Please visit our company handbook for any policy clarification.
